

ABDOMINAL WOUNDS

ANATOMY

Impaled Objects

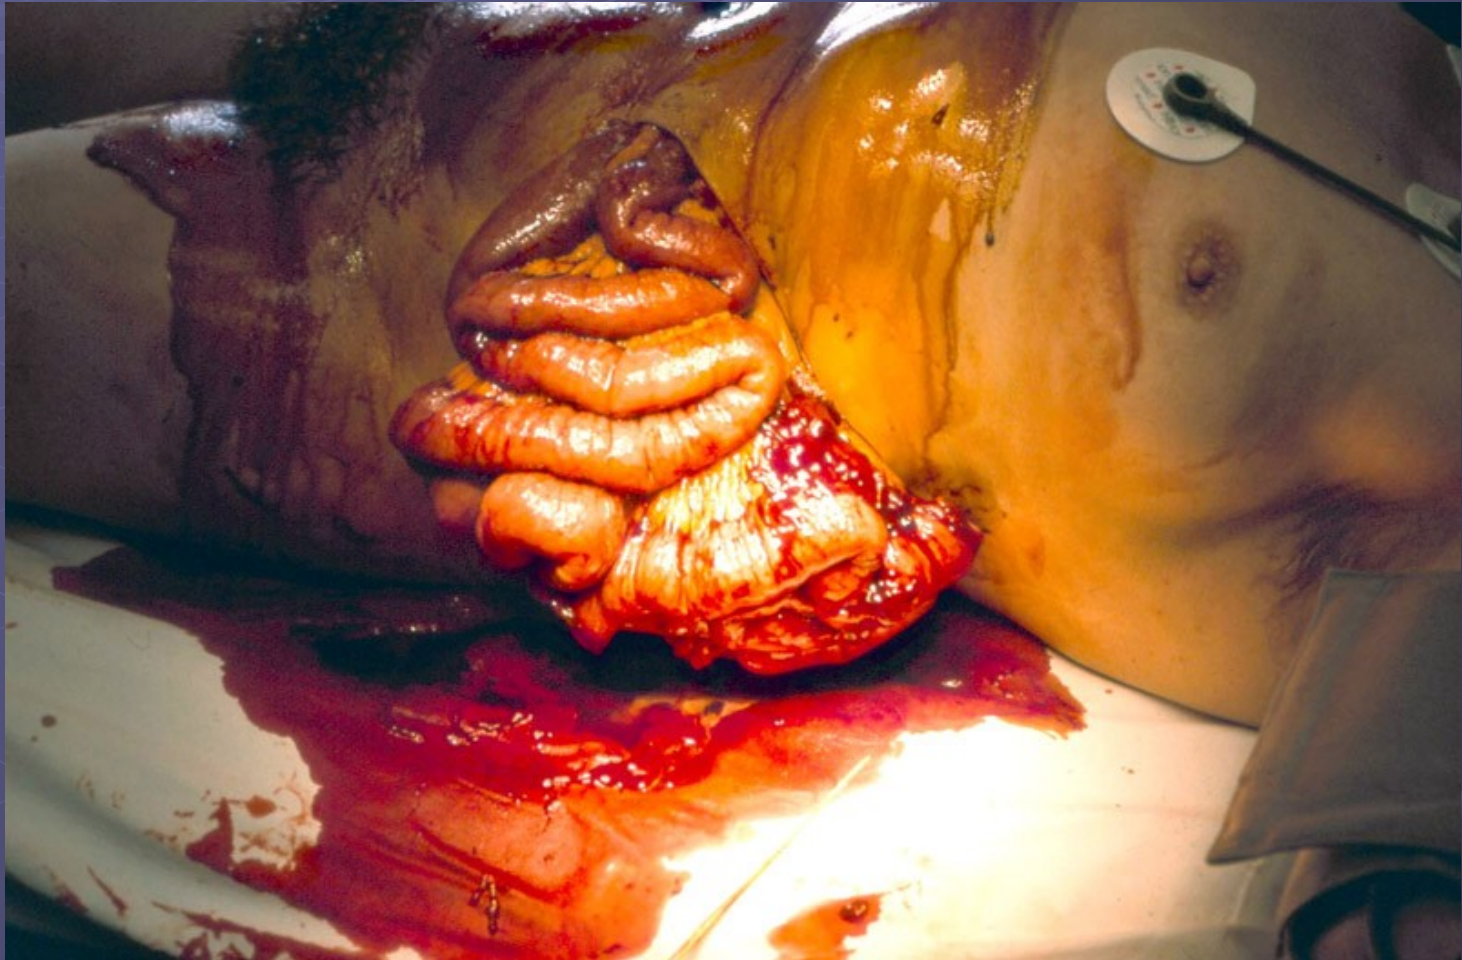

How are impaled objects managed in the field?

Impaled Objects

- Leave impaled objects in place!
- Apply dressings around site to minimize hemorrhage.
- Stabilize object the best you can.

EVIScerATIONS

EVISCERATIONS

- Cover entire area with a sterile, moist dressing.
- Keep casualty warm.
- Administer fluids to maintain radial pulse.
- Evacuate casualty to an MTF as soon as possible.
